

Industrial Cybersecurity

Spanish and German practical and regulatory solutions for more resilient industrial processes

In light of the most recent attacks on critical infrastructures and other companies the question arises how businesses and politics can enhance Europe's cyber-resilience. First and foremost, enterprises strive to enhance the cyber-resilience of their business processes by introducing risk-based cybersecurity measures. In addition, national and European legislators as well as standardisation bodies are currently revising IT and OT security requirements – such as the NIS 2-Directive. Apart from the regulatory dimension, on a technical level, industrial automation and control systems (IACS) are i.a. addressed by the proposed IACS Components Cybersecurity Certification Scheme, and in international standards.

Against this background, the Spanish Embassy in Berlin and the Federation of German Industries are co-hosting a webinar on **Wednesday, 29 September 2021 at 9:30 a.m.** The webinar provides an overview of the German and Spanish cybersecurity eco-systems, current legislative and standardisation developments, and best practices by German and Spanish companies contributing to more cyber-secure industrial processes. So if you are interested in learning more about the German and Spanish industrial cybersecurity ecosystems, please register free of charge [here](#).

09:30 Welcome remarks

Ricardo Martínez Vázquez

Ambassador of Spain in Germany

Iris Plöger

Member of the Executive Board, Federation of German Industries

09:40 Keynote

Spanish National Cybersecurity Institute, a panorama of the capabilities of the Spanish industrial cybersecurity sector

Lola Rebollo

Deputy Director for Driving Industry and R&D,
INCIBE – Spanish National Cybersecurity Institute

09:55 Keynote

German Cybersecurity Architecture – toward a resilient digital future

Nadine Nagel

Head of Department Cybersecurity for Economy and Society,
BSI – Federal Office for Information Security

10:10 Best Practices and Discussion

How can cybersecurity measures contribute to more resilient industry processes?

Francesc Leiva

Giesecke+Devrient

Andrés Joaquín Bravo

Partner Cyber Risk Advisory, DELOITTE ADVISORY S.L.

Natalia Oropeza

CISO, Siemens AG

Vicente Segura Gualde

Global Head of OT & IoT Cybersecurity, TELEFONICA Cybersecurity & Cloud Tech S.L.

Mario Buisán (moderator)

Economic and Trade Counselor, Spanish Embassy Berlin

Steven Heckler (moderator)

Deputy Head of Department, Federation of German Industries
